

8-inch gauged wall  
stone with tight  
dry-stack joints\*

## PRAIRIE GOLD FROM LYONS SANDSTONE

**BEAUTIFUL COLOR  
QUARRIED STONE  
COMPETITIVE PRICING  
GOOD AVAILABILITY**

GENUINE STONE

2-4-6" mix shown\*

## ◀ FULL VENEER

Gauged veneer in 2-4-6" or 3-6-9" patterns makes precision ashlar installations easy. Random veneer is also available.

## ▼ THIN VENEER

Our high-quality thin veneers are cost-competitive with manufactured stone. Use cut face for traditional or sawn surface for a more modern look.

3-6-9" mix shown

## ◀ PRODUCT LINE

Prairie Gold is available in a full product range, from thin veneer to hearthstones and mantles. Select full heights for dry-stacked projects or nominal for mortar.

## ▼ SLABS & STEPS

We offer random and specified landscape blocks and snap-cut, natural-cleft steps. Wire-sawn, irregularly-shaped slabs are sawn for thickness.

Snap-cut steps with natural cleft surface

## ▼ CLADDING

Sawn surface reveals stone's full range of inner colors and patterning. Its clean lines show off modern designs. Or choose natural cleft surface for higher texture. Both products precision cut to your specifications.

Sawn surface pavers cut to fit natural boulders\*

## ▲ PAVERS

With a sawn surface, snap-cut or sawn-sided pavers in standard sizes are an excellent value. Custom sizes or natural cleft are also available.

## ▼ WALL/CAPSTONE

Available in the same height patterns as full veneer. 8" wall stone makes perfect garden walls. Capstone has natural cleft or sawn surface with joints and edges to suit.
