ADVANTAGES OF STONE DECKING

- ❖ **Durability.** No decking material will out-last stone. Lifetime warrantee is just the beginning.
- ❖ **Color stability.** Stone decking will not change color in the sun.
- ❖ **Easy Installation.** No drilling or worrying about spacing, just run the glue and set the stones in place.
- ❖ **No Hardware.** Expensive and time-consuming hardware is not required.
- ❖ **Perfect Surface.** No hardware means no marks on the surface.
- ❖ **Versatile Joist spacing.** Stone will not warp or bend. Our sandstone can support over 3500 Lbs. on a 24" span, meaning you have fewer joists to install.
- ❖ **Patterns.** We can do a wide range of patterns provided all the joints in one direction fall on joists.
- ❖ **Safe.** No risk of splinters and more slip resistance, especially when wet.
- ❖ **Appearance.** The natural variation in color means every deck will be unique. A range of materials can also be used to create a unique look.
- ❖ **Cost.** You get a life long product for the same as composite decking. (Patterns may be more) Combined with easier installation and no hardware, you can provide your customers a higher quality product for the same price.
- ❖ **The environment.** This stone is quarried in a sustainable manner in the US. No plastic made from oil or wood from threatened
