

## INNOVATIVE

Natural Stone Decking™ brings the beauty and durability of quarried stone to your outdoor deck experience. A virtually maintenance-free surface that will last a lifetime or more, natural stone decking by Lyons Sandstone is a local and sustainable product that's quarried by time-honored methods and cut to shape on our state-of-the-art stone saws.

Created in Colorado, Natural Stone Decking™ easily handles Colorado's weather extremes. Natural flagstone is cut and notched to fit perfectly over the support structure of your deck, whether steel or wood, to make a smooth, regular surface. Sawn sides and spacers create straight, tight joints between stones.

Natural Stone Decking™ is a patent-pending product.

## NATURAL AND SUSTAINABLE

Natural stone decking is made of locally and regionally sourced, quarried stone. We don't use toxic chemicals, plastics, paints, sealers, stains, or energy-intensive kilning or crushing in our manufacturing process. No old-growth forests or tropical hardwoods are endangered. Our quarry has been worked for 140 years and has enough reserves to last another 300 years.

# NATURAL STONE DECKING™

Natural and Sustainable.  
Long-lasting and Durable.

Low-maintenance.

Fireproof.

A deck for a lifetime.

## COLORS

Lyons Sandstone currently offers Natural Stone Decking™ in three distinctive materials and a range of finishes. Individually or in concert, these colors let you create a deck that matches your aesthetic.

### Milagro

### Lyons Red

### Aspen Natural

## PATTERNS

By varying the spacing of joists, cutting hidden notches in differently sized stones, and changing stone orientation, you can make decks in a wide range of patterns.

### Hidden notch

Possible patterns include:

Simple square • Running bond

Basket weave • Herringbone • Pinwheel

Any of many iterating slate patterns

### Advancing Pinwheel

## VALUE AND SAFETY

Most traditional decking materials require regular maintenance that can cost more than the original installation over the life of the deck. Natural Stone Decking™ requires ***NO MAINTENANCE***. Power wash it to help keep it looking fresh, or choose to let it naturally mature.

With its unmatched strength, durability, and ability to resist ultraviolet light, Natural Stone Decking™ is the only decking material that you can count on to not just last, but look better over time.

**140 year old sidewalk, Boulder CO**

Natural Stone Decking™ arrives at your site, cut to size and ready to install. Installation is fast, easy, and clean.

Natural Stone Decking™ is tested and engineered not just to meet the load requirements of building code, but exceed them by a factor of six or more.

Natural Stone Decking™ is inherently fireproof. No matter how many embers land on the surface, it will never catch fire. It allows you to incorporate a deck into the fireproof envelope around your home.
